

TVC Track Design and Project Consulting

DESIGN

Are you considering a track renovation or building a new facility? Let Total Venue Concept assist you. Years of experience, including trial and error, will save you from pitfalls. Even quality contractors DO NOT understand what is needed for a quality competition surface.

Complete flatness and texture specifications.

Concrete Mix Designs (many mistakes can be saved here)

Asphalt Mix Designs that work (Proper mix for climate and use)

Sub Base, Subgrade, and Surface design and specifications

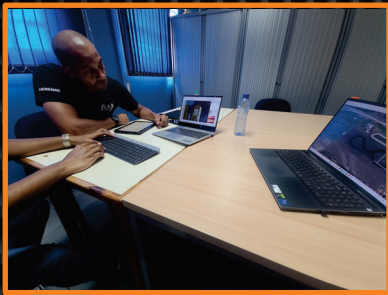

TVC does NOT guess; we used proven Designs

Hundreds of hours of written specification and instructions.

Where to use the most cost-effective material

Overall, park design for proper competition flow

Spotting costly mistakes BEFORE they are permanent

PROJECT MANAGEMENT

TVC will work with your architects, general contractor, and subs to ensure your facility is completed taking into account the large and subtle details that change a quality facility to an EXCELLENT facility, regardless of the overall size.

On site will manage surface build as the sub base, sub grade and surface are placed.

Surface Reclamation and Grinding

TVC has the ability to save you hundreds of thousands of dollars by fixing your existing surface in lieu of replacing it. We own over nearly a million worth of surface reclamation tools and grinders. We sublet multiple profile grinding companies we only sub contract companies that will allow TVC to manage their work.
